Security features

MAGNACHEK security features include: simulated watermark, microprinting, padlock security, non-negotiable stub backer, endorsement warning, anti-splice backer, copy-void endorsement, image-friendly amount box, voidless postal window, copy-void pantograph, covert fluorescent fibers, enhanced toner adhesion, solvent-reactive color spotting, warning band, coin-reactive mark.

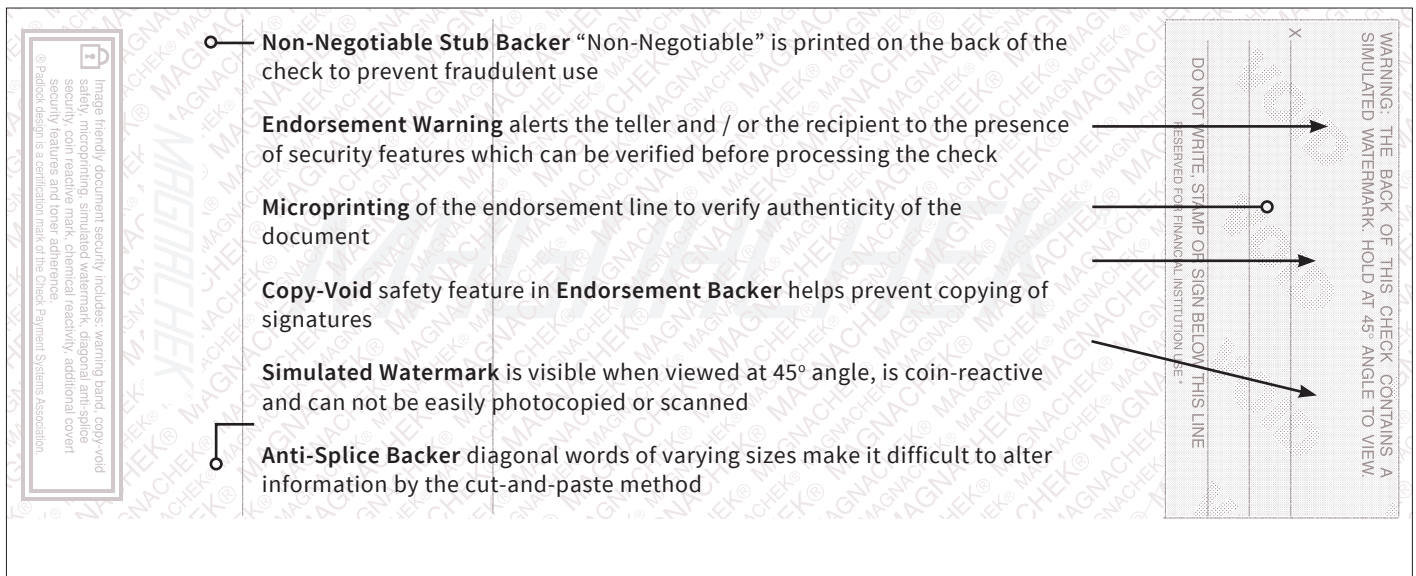

Placement of features on the front of the check:

THE FACE OF THIS CHECK IS PRINTED GREEN - THE BACK CONTAINS A SIMULATED WATERMARK

- Microperforation** allows for clean, easy tear
- Warning Band** alerts tellers or check recipients to the presence of security features
- Copy-Void Pantograph** when check is photocopied the word VOID appears
- Covert Fluorescent Fibers** are invisible fibers in the paper that “glow” when held under an ultraviolet light
- Enhanced Toner Adhesion (ETA)** a special surface treatment so that images cannot be lifted or scraped from the document
- Image-Friendly Amount Box** to meet Check 21 Compliance regulations
- Voidless Postal Window** where copy-void is removed for increased postal compatibility
- Solvent-Reactive Color Spotting** reacts to solvents which may be used to alter the paper, resulting in a chemical stain
- Padlock Security** icon to alert tellers of security features - the back of the check details features for the tellers
- Coin-Reactive Mark** is an invisible layer that changes color when scratched with a coin to ensure document authenticity
- Microprinting** is too small to be photocopied
- Clear Band** allows for accurate MICR reading

Placement of features on the back of the check:

- Non-Negotiable Stub Backer** “Non-Negotiable” is printed on the back of the check to prevent fraudulent use
- Endorsement Warning** alerts the teller and / or the recipient to the presence of security features which can be verified before processing the check
- Microprinting** of the endorsement line to verify authenticity of the document
- Copy-Void** safety feature in **Endorsement Backer** helps prevent copying of signatures
- Simulated Watermark** is visible when viewed at 45° angle, is coin-reactive and can not be easily photocopied or scanned
- Anti-Splice Backer** diagonal words of varying sizes make it difficult to alter information by the cut-and-paste method
