Security features

BASICHEK security features include: simulated watermark, microprinting, padlock security, non-negotiable stub backer, endorsement warning, anti-splice backer, copy-void endorsement, image-friendly amount box, voidless postal window, copy-void pantograph, covert fluorescent fibers, enhanced toner adhesion, solvent-reactive color spotting, warning band, coin-reactive mark.

Placement of features on the front of the check:

THE FACE OF THIS CHECK IS PRINTED GREEN - THE BACK CONTAINS A SIMULATED WATERMARK

Microperforation allows for clean, easy tear

Copy-Void Pantograph when check is photocopied the word VOID appears

Covert Fluorescent Fibers are invisible fibers in the paper that "glow" when held under an ultraviolet light
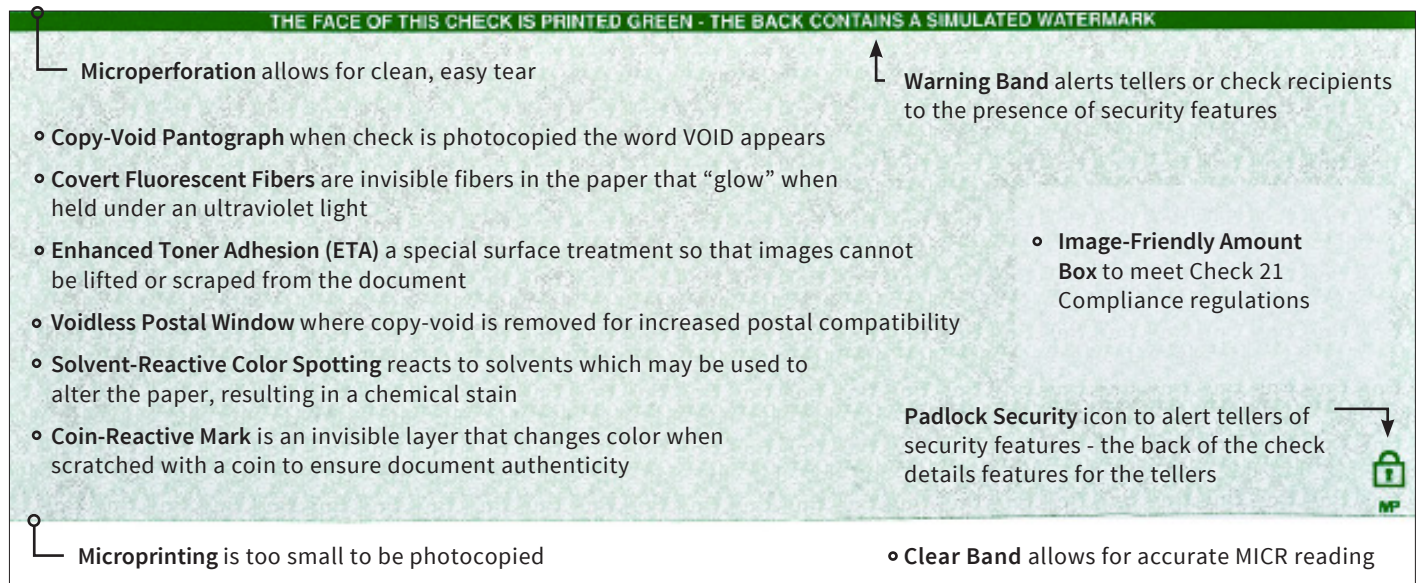

Enhanced Toner Adhesion (ETA) a special surface treatment so that images cannot be lifted or scraped from the document

Voidless Postal Window where copy-void is removed for increased postal compatibility

Solvent-Reactive Color Spotting reacts to solvents which may be used to alter the paper, resulting in a chemical stain

Coin-Reactive Mark is an invisible layer that changes color when scratched with a coin to ensure document authenticity

Microprinting is too small to be photocopied

Warning Band alerts tellers or check recipients to the presence of security features

Image-Friendly Amount Box to meet Check 21 Compliance regulations

Padlock Security icon to alert tellers of security features - the back of the check details features for the tellers

Clear Band allows for accurate MICR reading

Placement of features on the back of the check:

Image friendly document security includes : warning band, copy-void safety, microprinting, simulated watermark, diagonal anti-splice security, coin reactive mark, chemical reactivity, additional covert security features and toner adherence.

® Padlock design is a certification mark of the Check Payment Systems Association

Non-Negotiable Stub Backer "Non-Negotiable" is printed on the back of the check to prevent fraudulent use

Endorsement Warning alerts the teller and / or the recipient to the presence of security features which can be verified before processing the check

Microprinting of the endorsement line to verify authenticity of the document

Copy-Void safety feature in **Endorsement Backer** helps prevent copying of signatures

Simulated Watermark is visible when viewed at 45° angle, is coin-reactive and can not be easily photocopied or scanned

Anti-Splice Backer diagonal words of varying sizes make it difficult to alter information by the cut-and-paste method
