

Improve Efficiency and Reduce Waste by Eliminating the Envelope

Product Overview

ULTRASEAL self mailer pressure seal forms are the cost-effective and environmentally efficient way to create, process, and deliver mailed pieces without an envelope. By eliminating the printed envelope from the process, pressure seal has become the more efficient and “green” alternative when doing office mailings. Folding, stuffing, gluing, and heating of mailings and envelopes are a thing of the past. ULTRASEAL pressure seal solutions from Relyco are the future.

Relyco offers the largest variety of stock items, in addition to customized solutions to suit your specific business needs. You will be amazed at just how many office mailings and applications are made more successful, easier, and efficient by converting to ULTRASEAL.

What Is Pressure Seal?

Unlike other types of mailers that require glue, heat, or water to seal them, our printer-compatible ULTRASEAL self mailers have narrow bands of pressure-sensitive adhesive. Once you print the pressure seal mailing piece in your color or black and white laser printer, the forms can then be fed into any one of the Formax™ pressure seal machines available from Relyco. These machines take care of all the folding and sealing, utilizing pressure that activates the special paper coating. The machine completely seals the edges of the piece to creating a ready-for-mail document – no water, glue, heat, or envelope needed!

The process is faster and cleaner than any other self mailing product on the market, making it the most cost and environmentally efficient way to create, process, and deliver mailed pieces without an envelope.

One Solution for All Your Business Needs

Why are businesses are turning to ULTRASEAL? Simply put, because ULTRASEAL self mailers from Relyco get opened, reduce processing times, and eliminate the need for envelopes. Available in a variety of different colors, sizes, and formats, self mailer pressure seal forms can be used in a wide range of applications.

ULTRASEAL pressure seal forms offer up to 13 different security features to protect your business, so you can feel confident knowing that your highly sensitive information is secure. Additional custom pressure seal security features are also available.

Time is Money – Pressure Seal Can Save You Both

Taking on any office process transformation can seem costly and time consuming at first, yet with pressure seal, savings of time and money can be realized immediately. By eliminating labor intensive activities like folding, stuffing, and sealing, our pressure seal solutions can reduce your overall mail processing costs by nearly 50% and leave you with time to focus on revenue-generating projects.

In addition, pressure seal forms can also be custom printed in today’s office laser printer, complete with postage, allowing for control of costs, customization, and either bulk or one-off delivery of mailed pieces when necessary.
