How are Synthetic Labels used?

Removable labels:

- Repositionable signs
- Window clings
- Price tags

Permanent labels:

- Signage
- Bottle labels
- Package labels
- Brand decals
- Shipping / crate labels

Marine & laboratory permanent labels:

- Chemical drum labels
- Paint can labels
- Petroleum drum labels
- Warehouse labels
- Distribution labels

Synthetic removable labels

- **Low tack adhesive** - allows for ongoing repositionability and ultra-removability
- **Reusable** - stick and re-stick as needed
- Made of vinyl
- Label can be applied at 50°+ Fahrenheit
- Once applied, adhesive will hold from -40° to 176° Fahrenheit

Synthetic permanent labels

- **Long-lasting adhesive** - guarantees your label will stay in place
- **Paper liner or film liner** - choose your preference
- Made of polyester
- Label can be applied between 41° to 122° Fahrenheit
- Once applied, adhesive will hold from -40° to 158° Fahrenheit

Marine & laboratory grade permanent labels

- **Certified** for British Maritime Standard 5609:1986 Section 2 and 3 marine and laboratory immersion
- **Permanent adhesive** - designed to withstand wash-downs & total seawater immersion
- Made of polyester
- Ideal for rugged labeling in harsh environments
- Label can be applied between 41° to 122° Fahrenheit
- Once applied, adhesive will hold from -40° to 158° Fahrenheit
