

Relyco Secure Document Solutions

Protect secure documents, coupons, prescriptions and medical records from illegal duplication, or alteration

Ideal for any business or organization—including government, education, retail, healthcare, and legal—that needs to protect the integrity of its original documents, Relyco's multipurpose security paper and prescription/medical paper incorporate the latest security features.

Features and Benefits

- **Embedded security features**
 - Protect the integrity of legal and health care documents by preventing duplication and/or alteration
 - Copy-void pantographs
 - Artificial watermarks
 - Toner adhesion
 - Florescent fibers
 - Chemical reactivity
 - Thermochromic ink
- **Laser-compatible security paper available in green or blue tint**

Common applications for security paper include:

- Wills
- Grade Reports
- Coupons
- Transcripts
- Insurance Policies
- Contracts
- Deeds
- Titles

Common applications for secure prescription ("Rx")/medical paper include:

- Prescription Pads
- Confidential Patient Files & Records
- Medical Test Results
- Cat Scan and MRI Results

Relyco & DSS – Secure Document Solutions

Relyco's partnership with DSS (Document Security Systems, Inc.), the leader in customized document protection solutions has allowed the development and release of the most secure, protected documents in the world, including checks, coupons, secure documents and more. In fact, the recent release of Relyco's PROCHEK+PLUS™, the industry's first "Super Check," offers the most secure blank laser check stock available featuring 16 fraud deterring security features, including Securatek™ Copy Prevention Technology, the newest development in check security.

Secure Custom Coupons

Relyco & DSS also work together to provide currency grade security printing for retail and private coupons. With AuthentiGuard patented security features layered into fully printed, full color security print coupon runs or as custom paper templates for finishing at your facility, Relyco and DSS work with you to design the security features to meet your program's needs.

Recommended Features

- 1.) Pantograph 4000 - the latest generation void pantograph technology that makes coupons that not only can't be copied correctly but also can't be scanned accurately.
- 2.) Barcode Barricade - feature that protects bar codes by greatly reducing their function on copies and scans.
- 3.) Block-Out - a color copy protection feature that results in all black or highly distorted color copies from certain high-end models of copiers.

The secure print facility from DSS and its team of experienced security printing professionals make sure that over runs are destroyed and all art files and samples are locked up. We can even offer gps tracking of your shipment. Our commitment to security includes even the physical security of your coupons while in production.

Prefer your coupons digitally delivered, but still want security features? We can do that too.

Contact us today to learn how we can help protect your physical or digital coupons or for a quote. Please fill out the information below and a Protected Paper representative will be in contact with you within 24 hours.

Relyco Secure Document Solutions

Multipurpose security paper features an embedded pantograph that causes the words “UNAUTHORIZED COPY” to appear repeatedly on every photocopied sheet, as well as a coin-reactive watermark that is printed using a special ink, which does not appear on photocopies.

The “Rx” is symbol printed in red thermochromic ink on the back of the **secure medical paper**, which offers a number of other security features, including:

- Copy-void pantographs, which ensure that the word “Void” appears when the paper is photocopied
- Artificial watermarks that are printed using a special, coin-reactive ink, which does not show up on photocopies
- Toner adhesion, an invisible coating on the front and back of the paper to help anchor the toner securely to the sheet, making it difficult to alter or remove
- Florescent fibers that are visible only with a black light and are impossible to replicate with a copier
- Chemical reactivity designed to ensure that exposure to solvents—including chemicals used to lift or “wash” toner from a page—will cause noticeable, indelible stains that make tampering obvious and render the paper useless
- Thermochromic ink, which is a heat-reactive ink that disappears or “drops out” when photocopied, exposed to a heat source, rubbed with a fingertip, or even breathed upon, and can be used to verify a document’s authenticity

Relyco also offers a complete line of SecureRx printers from TROY.
