

# Electronic Invoice Capture and Routing

## **Reduce Processing Costs by 60% or More**

Relyco's invoice capture system is a unique and powerful combination of software and service designed to streamline your invoice receipt and payment processes. Data from vendor invoices, whether paper or electronic, is captured electronically through a range of easy submission options. Gathering 100 percent of invoice data electronically means you'll get invoices faster and reduce vendor inquiries as you eliminate the need for manual data input—for greater security and cost savings. The best part? We do the heavy lifting.

Relyco's routing solution will enable simplified invoice approval, auditing, and tracking, as well as extensive reporting and analytics, for enhanced visibility that means more effective cash-flow management and less paper shuffling. Plus, when you integrate automated invoicing with Relyco's electronic payment offering, you'll benefit from a fully automated accounts payable process.

Relyco's Electronic Invoice Capture and Routing Solution works seamlessly with hundreds of accounting systems and is SSAE 16 certified and Sarbanes-Oxley 404 compliant.
