

Unlocking the Value of Your Printer

Get the most from your printer investment with solutions from Relyco!

When you have the right tools, your laser printer can be the workhorse of your business, and financial services organizations and departments – from banks and credit unions to insurance companies, payroll organizations to accounts payable and receivable departments – benefit when they leverage their laser printer in innovative new ways.

Consider this...

- A large financial institution uses MICR laser check printing solutions – including MICR printers, toner and secure check stock – to print secure laser checks
- A credit union prints secure, branded cashiers' checks on custom check stock
- An accounts receivable department issues monthly statements on secure, self mailer pressure seal forms
- An accounts payable department takes advantage of laser check printing software and secure check signers to ensure vendor payments
- A small credit union creates personalized member identification cards using durable, laser-compatible ID cards

All this – and more – is possible with your laser printer. Laser printing is cost effective and efficient, and puts you in control. You just need the right types of paper for your application – and Relyco can help.

Thousands of Uses for Your Unique Financial Environment
