

Temporary plates that weather the storm

Let's work together to improve the security and
durability of your temporary license plate program.

RELYCO
SPECIALTY PRINT SOLUTIONS

Temporary plate fraud is on the rise. States are losing revenue.

With plates made from REVLAR synthetic paper, you have all these options:

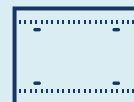

- Laser printable versions*
- Ability to incorporate overt & covert security features
- Compatibility with open road tolling and electronic readers
- Recycle as a #1 plastic
- Perforations: so you can include information on the perimeter that you want the buyer to keep after tearing out the plate
- Choices in terms of materials, thicknesses and coatings
- Options for cars, motorcycles, trailers, watercraft and recreational vehicles

**RELYCO partners with leading printer companies to ensure printers work with media: Canon, OKI, Lexmark, Ricoh, HP, Lexmark, Xerox, Konica-Minolta, Dell, Kodak, Samsung and Troy.*

REVLAR with PrintArmor Pro Coat™ is your best choice for secure and durable temporary plates.

SECURITY OPTIONS

The American Association of Motor Vehicle Administrators (AAMVA) recently released an updated license plate standard that provides best practice information on materials and what should be printed on plates. This standard calls for security features, controlling access to stock and printing temporary plates on-demand using special number fonts that are designed for plate readers. Additionally, durable materials should be used. RELYCO can help you exceed these standards.

RELYCO security options for temporary license plates

Security features available for both stock and custom plates.

- Controlled stock — only sold to authorized dealers or state agencies
- Stock plates with generic watermark
- Custom watermarks or state seals
- Unique die-cut size or bolt hole pattern
- Holographic decals
- Secure tamper evident films
- Encrypted barcode
- Control number and/or lot number

Example of recommended printed RELYCO Temporary License Plate that meets AAMVA standards

- Increase tolling and parking revenue by printing plates so they are easy to read by LPRs
- Reduce crime by securing and controlling temporary plate stock
- Improve customer service with better print quality, easier to read and more durable plates

OUR EXPERIENCE & EXPERTISE

RELYCO is a leading industry expert in temporary license plates.

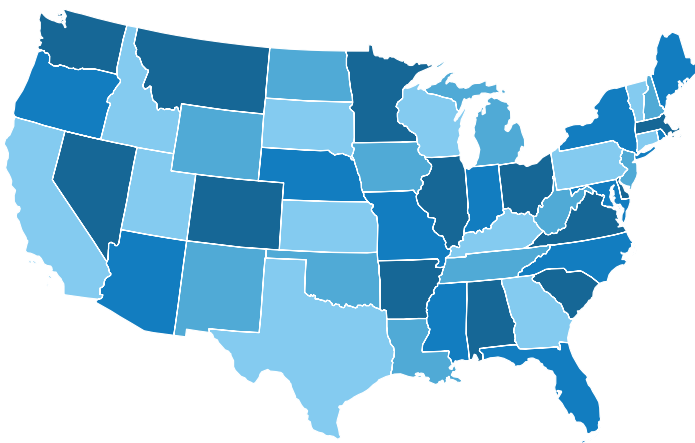

With our temporary plates being used by 12 states, RELYCO has experience providing a wide range of plate options.

Many of our customers are auto dealers who purchase plates directly from RELYCO, some are state agencies and others are agency contracted print providers who purchase blank stock that is then customized for state contracts.

Build a program with RELYCO

RELYCO understands the requirements for building temporary plate programs that are best in class and meet motor vehicle agency industry standards. We're a trusted advisor that not only supplies the material, but we also help states set up secure and durable temporary plate programs.
